PROFESSIONAL SUMMARY

Backend Developer at GOIT with experience building scalable backend applications using Django, Django REST Framework, Celery, Redis, PostgreSQL, and Docker. Skilled in RESTful API development, third-party integrations, CI/CD pipelines, and Linux deployment using Nginx and Gunicorn. Passionate about clean architecture, automation, and delivering reliable production-ready solutions.

EDUCATION

Taibah University, AL Madinah, Saudi Arabia

Bachelor of Science, Computer Science

Web Development Bootcamp - Tuwaiq Academy

Feb 2025 - May 2025

EXPERIENCE

Software Developer - GOIT Company, Riyadh, Saudi Arabia

Jul 2025 - Present

- Developed and maintained scalable backend applications using Django in collaboration with React developers and UI/UX designers.
- Designed, developed, and integrated RESTful APIs, including third-party API integrations.
- Implemented asynchronous background tasks using Celery and Redis while optimizing database performance using Django ORM and PostgreSQL.
- Containerized applications using Docker and deployed backend services to Linux servers with Nginx, Gunicorn, and Certbot.
- Worked with CI/CD pipelines to automate testing, build, and deployment processes.
- Participated in production deployments, Linux server maintenance, and troubleshooting production issues.
- Developed and customized content management features using Wagtail CMS, including theme customization and administrative interface enhancements.
- Collaborated in Agile teams using Git/GitHub and contributed to Business Requirements Documents (BRDs).

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, SQL, Java, HTML, CSS
- Backend Development: Django, Django REST Framework (DRF), Django ORM, Wagtail CMS, Celery, Redis
- API & Integration: RESTful APIs, Third-Party API Integration, JWT Authentication, OAuth, Swagger/OpenAPI, Postman
- Database: PostgreSQL, MySQL, SQLite
- DevOps: Docker, CI/CD, Linux, Nginx, Gunicorn, Certbot, Docker Compose
- Testing: Pytest, Unit Testing
- Version Control: Git, GitHub
- Frontend: React.js, Bootstrap

PROJECTS

- GroupBuy Web Platform - Tuwaiq Academy: Django-based platform for secure and scalable group purchasing.
- 3D Interactive Experience - Personal Project: React-based interactive UI with responsive animations.

CERTIFICATIONS

- Web Development Bootcamp - Tuwaiq Academy (Feb 2025 - May 2025)
- REST API with Python and Django - Tuwaiq Academy (Aug 2024)
